

Clark Forklift

Presently, there are no less than 350,000 Clark lift trucks performing globally, and more than 250,000 in commission in North America alone. With five major lines across the world, Clark is proud to be one of the most expansive corporations in the industry. Heavy duty vehicles ranging from 1,500lb to 18,000lb capacities, dual fuel, petrol, LPG, hand powered trucks, narrow-aisle stackers and electric riders are a few of their specialties.

Clark Totalift, handles more than 120,000 specialized parts fabricated for 20 unique brands of lift trucks and automated equipment. Your local Clark Seller is your complete source for availability of all your parts needs provided by Clark Totalift.

Clark features an exceptional Parts Distribution team. The parts warehouses are conveniently positioned in Changwon, South Korea and Louisville, Kentucky to guarantee exceptional service to both their buyers and their dealers. For over 90 years, Clark has surpassed industry standards, being one of the most actively advancing companies. Driven to provide the highest level of value and service to our customers, Clark remains on the cutting edge when it comes to improving productivity and benefiting performance.

Clark Totalift has a really amazing international support network. With over 550 locations globally, seller representation in over 80 countries and 230 locations in North America, their high level of commitment to their clients predominates the material handling industry.

By pioneering the operator restraint system safety feature, Clark proudly remains a leader of innovation in the industrial equipment and automated forklift industry. This exceptional commitment to safety is currently a customary feature on every lift truck.

Clark's continual mission to have the No. 1 Quality system in the industry is proudly demonstrated by ISO 9001 — Clark, is the first lift truck producer across the globe to be certified with the internationally accepted quality standard ISO 9001 for each and every one of their manufacturing plants. Also, the ISO 14001 Environmental Management System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement permits Clark to be ready for any number of environmental restrictions, thus placing them in a prevailing market position.

Lean Production

Clark has preferred the extremely economical and advantageous structure of "Lean Manufacturing" for its assembly plants and use of resources. This structure was developed to acknowledge the most successful method of production facility stewardship and ensuring maximum proficiency. Clark has completed this transition of its Korean plant. COPS which is Clark Optimized Production System, similarly focuses on quality of product and services and manufacturing efficiencies.

Engine Design

By working in concert, Clark's product suppliers and engineers communicate towards improving product efficiency while minimizing expenses. The new value engineering program combines innovative product growth and delivers improved client support and service within the industry.
